conque

Run interactive commands inside a Vim buffer

Conque is a Vim plugin which allows you to run interactive programs, such as bash on linux or powershell.exe on Windows, inside a Vim buffer. In other words it is a terminal emulator which uses a Vim buffer to display the program output.

Updates

Version 2.3 released (2011-09-02)

Bugfix release.

<http://code.google.com/p/conque/downloads/list>>Conque 2.3 available for download.

Installation

Full installation instructions

Usage

Type `:ConqueTerm <command>` to run your command in vim, for example:

```
:ConqueTerm bash :ConqueTermSplit mysql -h localhost -u joe -p sock_collection :ConqueTermTab Powershell.exe  
:ConqueTermVSplit C:\Python27\python.exe
```
